CHICAGO

WE have pleasure in presenting to our customers our latest catalog, a valuable book of reference for manufacturers and dealers interested in Cabinet, Upholstery and Drapery Hardware, Upholstery and Drapery Fabrics.

As we have been specialists in these lines exclusively for half a century, we justly claim to be in a position to render excellent service, and our constantly increasing patronage proves this beyond question. We have access to the best foreign and domestic markets, and are, therefore, in a position to quote lowest prices for standard quality merchandise. Our facilities are ample and we assure our customers that their orders will receive prompt and courteous attention.

The prices quoted are subject to change without notice, due to changing market conditions.

We will promptly answer inquiries or furnish additional information regarding any of the items listed.

Samples of upholstery and drapery fabrics forwarded promptly on request, to established dealers in our line.

It is our sincere aim to cooperate in every way with our customers.

LUSSKY, WHITE & COOLIDGE, INC.

May, 1931

CHICAGO

TERMS

Subject to change without notice, our terms to customers of approved credit are as follows:

All Chicago accounts are payable less the cash discount on the first of each month.

On country accounts in good standing, we allow sixty days' time if required, but reserve the right to ship C. O. D. or on ten days' time.

The present cash discounts are: On all Hardware items, 2% 10 days, 1% 30 days, net 60 days. These discounts also apply to numerous items of upholstery goods—viz.: Leather, Moss, Twine, Burlap, Denim, Cretonne, Chintz, Gimps, etc. On Damask, Mohair, Sunfasts, Tapestry, Velour, 50-inch Cretonne, 50-inch Chintz, and Plush, we allow 6% 10 days, 5% 30 days and 4% 60 days. No discount allowed after sixty days and invoices not paid at maturity are subject to sight draft without notice. All shipments F. O. B. Chicago, and our responsibility ceases when goods are delivered to transportation company.

All orders accepted subject to our ability to procure the merchandise from regular sources of supply and subject to delay from causes beyond our control.

Agents are not authorized to collect.

ATLASITE wheels are a Bakelite composition, solid hard black polished surface. Cannot rust or become discolored.

Not affected by heat or moisture.

Have self-lubricating bearing.

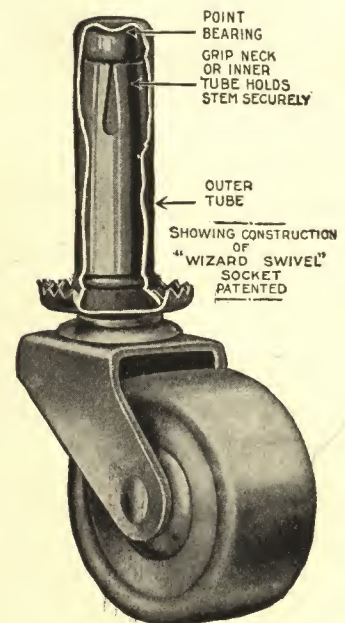

BACO wheels are similar to Atlasite excepting they have a semi-soft rubber moulded tread for linoleum, composition and polished hard-wood floors.

Have self-lubricating bearing.

The ball and socket principle of joint allows shoe to adjust itself to uneven surfaces,
hence the shoe will slide where casters will not roll

The glass shoe is the best on rugs, carpets and highly finished waxed floors

The mott metal shoe should be used on common floors or tile surfaces

Varnished floors must be waxed or oiled

Both style and size numbers must be given when ordering

SHOW ACTUAL SIZE

Sectional View

NEW TRIUMPH ALL-RUBBER TIPS have the same stem made of brass, which clinches into the wood, thus preventing the tip from falling out of the leg.

When in place the tip is almost invisible, as it corresponds in outline to the leg of the chair. When worn out can be easily removed and a new tip inserted

NACHMAN—COMFORT FIRST—SPRING UNITS
FOR
LOOSE CUSHIONS AND BACKS OF UPHOLSTERED AND WOVEN FURNITURE

Nachman Spring Units are made of the highest grade of tempered Premier spring wire, in two sizes; a spring 2½ inches in diameter or a spring 3 inches in diameter; both are 3½ inches in height. Each small spring is placed in an individual burlap cell. The assembled springs are securely held in place by a 10½-ounce burlap covering. The stitching across the top keeps each spring in place, yet allows each individual spring full freedom of action. These are exclusive features of Nachman spring construction. While less cotton is required with this type, nevertheless, they form the base for the most comfortable and substantial loose or permanent cushions that can be made—a cushion that will hold its shape and stand up.

LOOSE CUSHION UNITS

Coils 2½ inches Diameter, 3½ inches High, No. 16 Wire

No.	Number of Springs	Construction Size Inches	Price Each
D-467	42	15 x 17½	1.38
D-477	49	17½ x 17½	1.62
D-478	56	17½ x 20	1.86

D-577	49	21 x 21	1.96
D-578	56	21 x 24	2.22

For Bale Lots of 25 Units of a size—Prices upon application

BACK UNITS

The Nachman Spring Unit Back comes to you already prepared according to your specifications. There is a liberal allowance of burlap in the pocket. Upholstering with this back means greater engineering efficiency, as considerably less filling materials are required, which means a big saving on this item as well as in the cost of labor for installing. In fact, all there is to putting on a unit is to tack down smoothly, round off the top with filling material, pull over the front skirt and tack to the back of frame and the job is done. Under constructions and arms are handled the same way.

Coils 4¼ inches Diameter, 7 inches High, No. 14 Wire

No.	Number of Springs	Construction Size Inches	Price Each
D- 245	20	17 x 21¼	1.78
D- 246	24	17 x 25½	1.98
D-2414	56	17 x 59½	4.18

Coils 4¼ inches Diameter, 7 inches High, No. 14 Wire

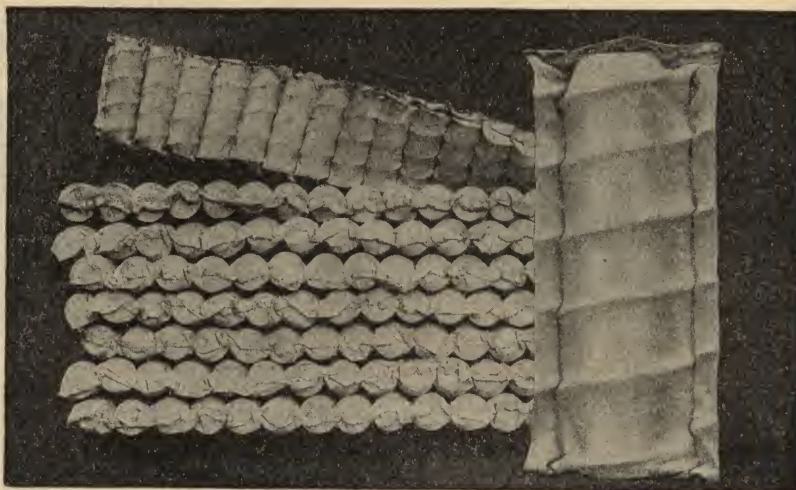

No.	Number of Springs	Construction Size Inches	Price Each

D-2416	64	17 x 68	4.68
D-2418	72	17 x 76½	5.20

MARSHALL TYPE CUSHION SPRINGS

Made of the highest grade of highly tempered Premier spring wire, each spring is $3\frac{1}{2}$ inches high by $2\frac{1}{2}$ inches diameter and enclosed in canvas, in its own pocket. Four of these springs occupy the same space as one of the old style stiff springs.

They are carried in stock already fastened together into mats, in sizes as listed or in strips containing 16 springs. These strips may be added to the mats to enlarge them or may be fastened together to make mats of any size required.

No. M-78	Mat $17\frac{1}{2} \times 20$	inches	1.68	Per mat

S & H SPRING-EDGE CLIPS

This clip can be applied at the rate of from fifteen to twenty per minute as soon as the operator becomes reasonably expert. It makes a positive attachment between the parts which will never give way. It is a talking point in selling the work. Labor considered, it costs no more than twine and tying. It is a clean, mechanical construction which at once appeals to the purchaser. This clip averages 95 to the pound.

"STA-WARM" ELECTRIC GLUE POTS

THESE ARE FURNISHED FOR 110 VOLTS UNLESS OTHERWISE SPECIFIED

Made for use on either direct or alternating currents of standard 110-120 voltage

220 Volts Furnished from Factory Only

The letters A, B, C and D on the cut are respectively described

A. Brush Wiper. Removable when cleaning pot. Saves glue—surplus scraped off brush, falls in pot

B. Heating Element. Wound tightly around aluminum inner wall so heat reaches glue instantly

C. Asbestos Insulation. Holds heat in, as a fireless cooker does

D. Automatic Heat Control or thermostat keeps two-thirds of the electric current turned off, except for a few minutes when starting the cold glue pot.

Makes over-heating impossible, protects heating element from burning out

"STA-WARM" GLUE POTS COMPLETE WITH COPPER CONTAINER

No. 601 Pint 29.00 Each

No. 602 Quart 33.50 Each

No. 603 ½ gal. 39.50 Each

is a powder, to be dissolved in water, that will loosen the paint, varnish or shellac in any brush, no matter how dry and hard, so that it can be readily cleaned with soap and warm water.

It dissolves wax, oil and dirt in Hardwood floors, leaving the surface clean for refinishing.

SOSS INVISIBLE HINGES—With Screws

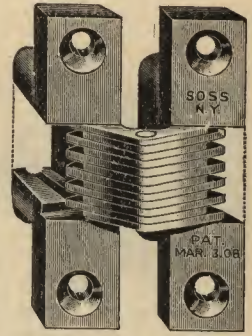

No. 0302 Actual Size

No. 0100 Actual Size

No. 0101 Actual Size

No. 0102-A Actual Size

Number 0300 is the same pattern as No. 0302 but smaller in size. Both Numbers can be used in any kind of wood, but when used in Hardwood the mortise should be $\frac{1}{32}$ inch deeper than given in table of specifications listed below.

Notice how the prongs naturally diverge when driven home.

Table of Specifications

Blunt Numbers	Polished Numbers	Length of Plates Inches	Width of Plates Inches	Depth of Mortise Inches	Minimum Thickness of Wood Inches	Clearance Between Plates Inches

PUNCH AND GROMMET SETTING MACHINE

Reduced Cut of Grommet Set

Punch and Cutting Die

Universal Machine Equipped with Grommet Set

Punch and Cutter Dies
for Universal Machine
For No. 0, 1, 2 or 3 Grommets
Each Number 6.00 Per set

Grommet Setting Dies
for Universal Machine
For No. 0, 1, 2 or 3 Grommets
Each Number 3.50 Per set

The Punching Die will cut a clean hole in carpet, leather, canvas, cloth or paper. It will do the work continuously without sharpening, as the cutting is done by a hardened steel ball which gives equal pressure at every point of the cutting edge.

Universal Machine
Without Dies 5.00 Each

Be sure to specify
for number of Grommet wanted

CORNER RATCHET BIT BRACE—With Interlocking Jaws

Designed for use in cramped positions not admitting of ordinary braces. The knurled ring between the head and the ratchet mechanism, operated by the thumb and finger of the hand holding the head, is for the purpose of starting and holding the bit until it is far enough in the wood, so that it will not reverse when the handle is turned back

GRINDING AND POLISHING HEADS

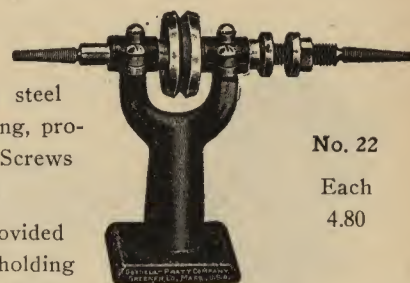

No. 24
Each
6.00

This Head has a $\frac{1}{2}$ inch steel Spindle 10 inches long, provided with a Taper Screw on one end, and a three-jawed Chuck that holds straight shank drills up to $\frac{1}{4}$ inch diameter on the other

It has Flanges for holding a wheel $\frac{3}{4}$ inch thick

The Pulley is $2\frac{1}{4}$ inches in diameter and will take either $\frac{1}{4}$ inch round or $\frac{3}{4}$ inch flat Belt

Iron parts are finished in red and black enamel; steel parts, polished. Height, 7 inches

No. 22
Each
4.80

This Head has a steel Spindle 10 inches long, provided with Taper Screws on each end

One end is also provided with flanges for holding a wheel $\frac{3}{4}$ inch thick

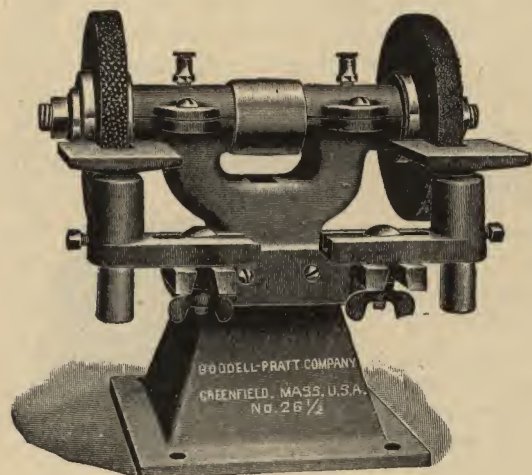

The Pulley is $2\frac{1}{4}$ inches in diameter

It will take $\frac{1}{4}$ inch round or $\frac{3}{4}$ inch flat Belt

Screws and Caps are brass

Iron parts are finished in red and black enamel; steel parts, polished. Height, 7 inches

BENCH GRINDER

No. 26 $\frac{1}{2}$ 11.80 Each

The Price given does not include the Grinding Wheels

Spindle 9 inches long Threaded ends are $\frac{3}{4}$ inch in diameter
Will hold two Grinding Wheels 6 inches in diameter by $\frac{1}{2}$ inch thick
Two sets of Flanges are provided for holding wheels up to $\frac{3}{4}$ inch thick
Wheels 6 inches in diameter with face wider than $\frac{1}{2}$ inch are unsafe to use on this machine

The Pulley is $1\frac{3}{4}$ inches in diameter with crown face $1\frac{3}{8}$ inches wide for use with flat belt

Machine is fitted with Patent Oil Cups. All nuts are case hardened

The Base is designed for great rigidity

Iron parts finished in Red and Black Enamel. Steel parts are Polished

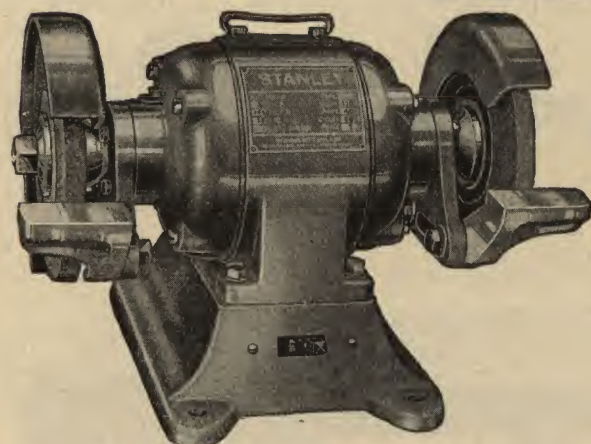

Height, 7 inches. Net weight, 9 pounds

The Work Rests will not admit of the use of Wheels larger than 6 inches in diameter and $\frac{1}{2}$ inch face

These Work Rests add greatly to the usefulness of the machine

STANLEY ELECTRIC BENCH GRINDERS

No. 586—BALL BEARING—6-INCH WHEELS

A good grinder for light work. Furnished with 2 six-inch grinding wheels (one coarse, one fine), wheel guards, tool rests, 8 feet of rubber covered cable, and switch

Specifications

*DC current—115 or 230 volts

*AC current—110 volts, 60 cycles; 110 volts, 50 cycles

Speed—3500 R.P.M. for 60 cycles

Diameter of wheel—6 inches

Thickness of wheel— $\frac{1}{2}$ inch

Diameter of arbor— $\frac{1}{2}$ inch

Length overall— $13\frac{3}{8}$ inches

Net weight—40 pounds

Shipping weight—57 pounds

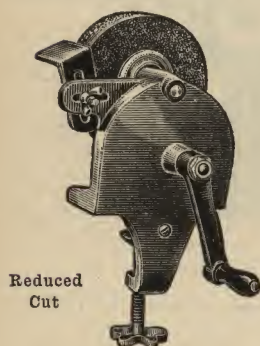

No. 586 DC current 75.00 Each

No. 586 AC current 70.00 Each

For Extra Grinding Wheels use only No. 544 Wheels listed on page 224

OIL STONES AND SLIPS

The **Washita** Stone is an extra quality stone, suitable for all kinds of tools
The **Arkansas** is very close grained and hard stone, not as quick cutting as the Washita, and is used where a very fine and sharp cutting edge is wanted
The **India** is a composition stone, made of corundum, and is the hardest, yet fastest cutting, oil stone on the market; the hardest metal on which a file will produce no effect, is readily cut by this stone

NUMBER OF POINTS (OR TEETH) IN ONE INCH

To prevent error in ordering, we illustrate here various points of saw teeth from four and one-half to eleven. Please note particularly that the term "points per inch" in saw teeth indicates the number of tooth points occurring within a space of one inch.

It does not mean that in a five point saw, for instance, there are five entire teeth to an inch. On the other hand, there is always part of one tooth less per inch than there are points.

ELECTRIC SOLDERING IRON

No. E-9031

12.76 Each

Made on the unit system

Diameter of Copper head 1 inch

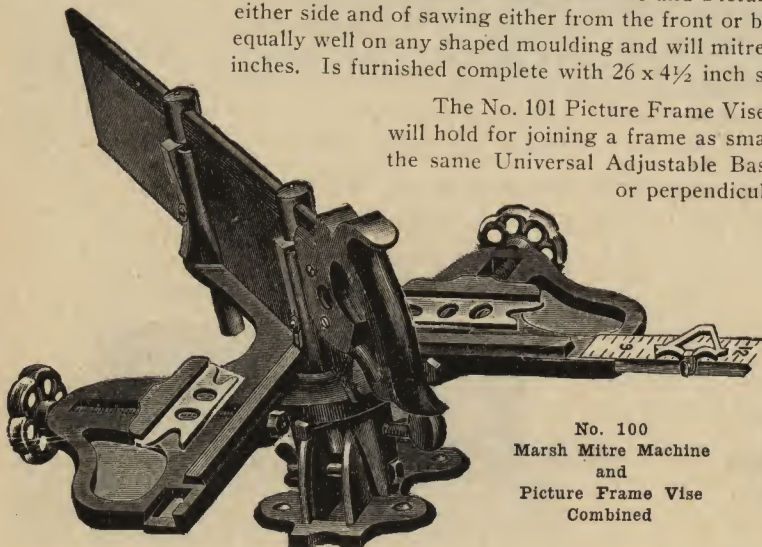

Every part is made interchangeable. Each tool is complete
with 6 ft. of cord—can be attached to any lamp socket

Will operate on both direct and alternating current of 110 or 220 volts; specify which is wanted

MARSH PICTURE FRAME MITRE MACHINE AND MITRE VISE

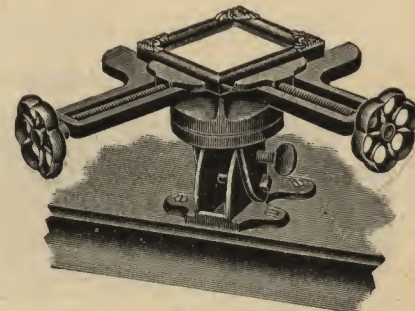

The No. 100 Marsh Mitre Machine and Picture Frame Vise admits cutting of moulding to measure from either side and of sawing either from the front or back. Will hold any moulding up to $4\frac{1}{2}$ inches wide. Works equally well on any shaped moulding and will mitre, cut and hold for joining any frame larger than $7\frac{1}{2} \times 7\frac{1}{2}$ inches. Is furnished complete with $26 \times 4\frac{1}{2}$ inch saw, Rule and Low Clamps.

The No. 101 Picture Frame Vise is smaller, takes moulding not over 4 inches wide and will hold for joining a frame as small as $3\frac{1}{2} \times 3\frac{1}{2}$ inches. Both No. 100 and No. 101 have the same Universal Adjustable Base admitting of holding the frame in either horizontal or perpendicular position for ease in boring and nailing frame.

Made of heavy galvanized
iron with simple
self-closing
tight-hinged cover

	Capacity	Each
No. 10	6 gals.	6.00
No. 20	10 gals.	8.24

	Size of Can	High
No. 10	11½ ins. x 13 ins.	
No. 20	14¼ ins. x 14½ ins.	

NON-EXPLOSIVE CANS for
storing and proper handling of
all volatile explosive liquids,
such as gasoline, naphtha,
benzine, turpentine, ammonia,
alcohol, rigoline, ether, etc.

The opening of the can is provided
with an automatic valve, which makes
it air-tight, preventing evaporation of
the liquid. Should the can be exposed
to extreme heat, generating excessive gas pressure, the
valve opens automatically, permitting the gas to escape,
and closes with reduced pressure.

40	20.40	40	4	5½	140	27.20	52

Nos. 130 to 140—Swivel Base

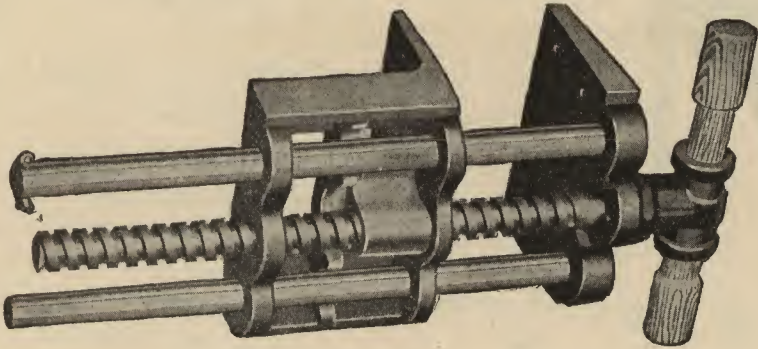

All Vises are of the highest grade, made of a special mixture of gray iron assuring great strength and rigidity. The Sliding Bar is carefully fitted into the broached opening. The Jaws are milled parallel and have fitted interchangeable tool steel faces. The Screw is made of forged steel, engaging in a malleable iron nut with carefully cut threads. All parts are interchangeable for respective sizes. The Swivel Base is securely locked by a specially designed nut, assuring rigidity.

WOOD-WORKERS BENCH VISES

SOLID NUT—NON-RAPID-ACTING—CONTINUOUS SCREW VISES

A Very Desirable Vise for Manual Training School Service

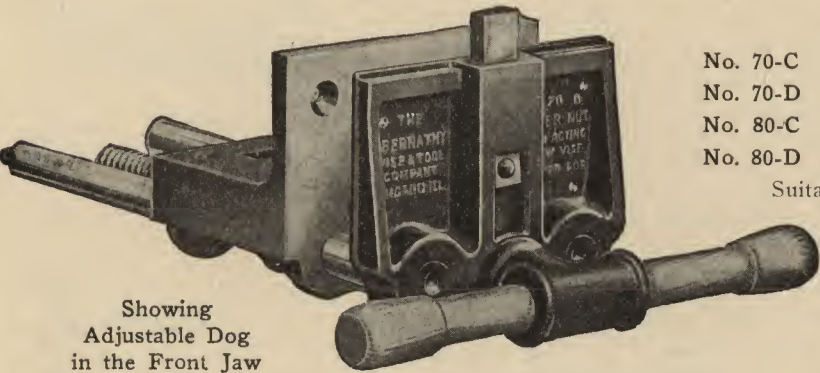

The screw is of 1 inch screw stock with a milled single 1/4 inch thread, 1/2 inch lead traveling in a solid phosphor bronze machined threaded nut. No adjustments needed. Will grip at all times. The only part subject to wear is the nut which can be replaced in a

minute, as the nut lays loose in housing where it is held securely when vise is assembled. All vises have a hardwood handle 9 1/2 inches long, with a threaded knob on one end. Inside of jaws are milled perfectly smooth and ends are polished.

CHAMPION HAIR PICKERS

Fifty years' service has demonstrated the Champion to be the best hair picker made. Iron plates on heavy hardwood legs, securely bolted to cylinder frame, hold firmly the crucible steel teeth. Babbitt metal lined journal boxes and a heavy hardwood frame, securely bolted together, make it the most durable and the strongest, lightest running machine on the market. All parts being interchangeable broken parts can be replaced on short notice. These pickers will pick any kind of moss, tow, hair, excelsior or other filling material; but Nos. 9 and 11 are especially recommended for picking cotton linters, shoddy, and other short fiber materials

RUSSIALOID—ARTIFICIAL LEATHER

RUSSIALOID for upholstering furniture, cushions, theatre seats, automobiles and public conveyances; for covering desks, screens, walls and tables.

RUSSIALOID combines exceptional wearing qualities, a soft richness and beauty of finish, and designs of unusual distinction surpassing animal leather.

RUSSIALOID has the feel and strength which experienced upholsterers demand.
IT TAILORS WELL AND IT WEARS.

RUSSIALOID is impervious to water and stain; does not fade or crack, but retains in spite of time and use, the wearing qualities for which PANTASOTE products are known the world over.

When ordering kindly specify exactly what is printed on the back of sample chosen; for example: "RUSSIALOID 3001 Blue Spanish Heavy 50 Inch."

Russialoid is not to be confused with Pantasote, which is made by the same company

PANTASOTE—ARTIFICIAL LEATHER—SOLID COLORS

UPHOLSTERY MATERIAL

NON-INFLAMMABLE AND ODORLESS

PANTASOTE was the first covering material put on the market for upholstery and general use that gave the appearance of leather.

Its continuous success since its first introduction has been due to the fact that it is **non-inflammable, odorless, dust-proof, hygienic and crack-proof**. All the colors are fade-proof except the red finishes which, while as fast as the best quality of red pigments procurable permits, are not guaranteed entirely non-fugitive or non-fading.

PANTASOTE remains soft and pliable under all conditions of climate and temperature, is easy to clean and is of proven durability.

SINCE ITS INTRODUCTION, many inflammable substitutes made with conventional pyroxylin coating have appeared. None of these have proven in service that they possess those outstanding qualities which have earned for Pantasote its unchallenged reputation as the leader in its field.

EVERY PIECE of Pantasote is made on a base of two special fabrics thoroughly united. This double fabric construction gives a veneer-like strength not possessed by the common and less costly single fabric construction.

When ordering, specify color numbers and width wanted.

PEBBLE GRAIN AND PLAIN COLORS ONLY

Stocked in both 36 inch and 54 inch Widths

25 yard pieces

Color	36 inch Width		54 inch Width	
	Cut Lengths Per Yard	Piece Lots Per Yard	Cut Lengths Per Yard	Piece Lots Per Yard
No. 73 Red	3.50	3.00	5.20	4.40

No. 99 Brown	3.30	2.80	5.00	4.20

There is a VAST DIFFERENCE in chemical composition and fabrication between PANTASOTE and the substitutes therefore, notwithstanding their similar appearance on the surface.

The QUALITY of Pantasote has never been lowered to meet price competition from inferior imitations. It is made in but one grade—the BEST.

CHASE NEVERSLIP—RUG LINING

CHASE **Safe-Tread** RUG LINING is made on a nice-looking whipcord backing on which is calendered a special rubber compound which holds the material to the floor with a grip that positively prevents its slipping. **Safe-Tread** Rug Lining lends to small rugs the same stability possessed by larger rugs.

While rugs equipped with **Safe-Tread** Rug Lining are prevented from slipping when stepped on, their positions on the floor may be shifted as easily as if Chase **Safe-Tread** were not attached to the rug.

But when stepped on quickly (and this is what makes rugs slip) Chase **Safe-Tread** forms a perfect binder between rug and floor; it prevents slipping—and serious accident.

60 yards in a Roll

Width 54 inches

	Cut Lengths Per Yard	Piece Lots Per Yard
No. 265	2.50	2.30

As Chase **Safe-Tread** is attached to the reverse side, it does not in any way affect the appearance of the rug, nor does it damage the floor.

It actually lengthens the life of the rug as it provides a resilient surface that absorbs part of the impact when the rug is walked upon.

You can attach Chase **Safe-Tread** to your rugs with a stout needle and strong thread. Just baste the **Safe-Tread** to the warp of the rug, covering the entire back of rug, except a border space of a few inches where the rug should show all around. Or, if you do not care to attach permanently—simply lay the Rug Lining upon the floor, coated side down, and place the rug over it.

NEVER-SAG CORRUGATED METAL WEBBING

Patented

For new furniture, use it the same as webbing but on cross sections of springs only. Fasten Never-Sag corrugated Metal Webbing with two wire nails on each end, use the clips supplied.

You can reinforce the old Webbing with this Never-Sag Metal Webbing.

To repair broken bottom, remove old webbing, fasten any broken spring cords inside, let bottom part of springs stand out, start to nail Never-Sag Corrugated Metal Webbing on front part of frame over center of each spring row, stretch even, nail other side and break off by bending. Do across the frame same way but weave in and out.

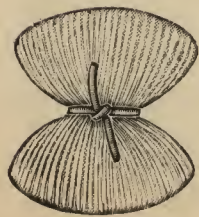

Set spring on cross sections, upper part inclined toward front of frame, then place center bend of clip on spring in groove, pressing against it, and pull prongs across Never-Sag corrugated Metal Webbing using hooks of another clip as tool.

For stretcher, take piece of wood about 9x2 inches with both ends padded. It will help to stretch Never-Sag corrugated Metal Webbing. Hold one end under corrugation, and the other against frame and press down.

Never-Sag Corrugated Metal Webbing, 16 feet in a roll.....1.00 Per roll

THE ON-IN-A-MINUTE UPHOLSTERED CHAIR SEAT

MADE TO ORDER ONLY

The ON-IN-A-MINUTE chair seat was perfected to meet a growing demand for a ready made upholstered seat to replace worn out leather or cane chair seats, which would be easy to attach and inexpensive in price.

They are made on a 3-ply concaved veneer, filled with new, sanitary, soft padding, hand upholstered with Morocco grained black or brown Spanish imitation leather, plain or tufted.

The ON-IN-A-MINUTE seat can be attached to any chair having an open seat frame. Place stick across bottom of chair and insert bolts. When fastened, the seat will not shift, slip or move.

Be sure to give Number, Color and Size Wanted

CUSHIONS

Reversible Back Cushions Nos. 1 and 2

REVERSIBLE AUTOMOBILE OR BACK CUSHION

Just the Thing for Motoring

This Back Cushion is made on scientific principles and will prove to be a great help to many.

Helps reclining position at the wheel.

Helps to reach pedals more easily.

Helps to exert more pressure on the brakes.

Helps to act as a back rest.

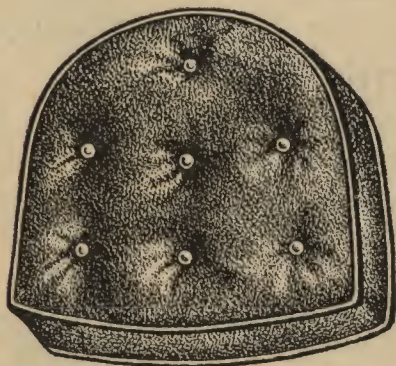

Helps to relieve backache or strain during long drives.

The cushion is made of artificial leather on both sides, corded or welted edge all around, button tufted, 15 inches wide, 16 inches high and tapers in thickness from $4\frac{1}{2}$ inches to $\frac{1}{4}$ inch.

No. 1 Auto Back Cushion. Made in heavy Black Artificial Leather, filled with new, soft, sanitary padding.... 4.20 Each

No. 2 Auto Back Cushion. Made in a durable Grained Artificial Leather, filled with soft resilient padding.... 3.40 Each

OFFICE CHAIR CUSHIONS

Office Chair Cushions Nos. 10, 15 and 20

Made in 15 and 18 inch sizes with 2 inch box. Black or Spanish artificial leather on both sides, with welted edges all around and button tufted.

No. 10 Made of extra heavy Black Artificial Leather, filled with new sanitary padding.
15 inch.... 4.70 Each
18 inch.... 5.10 Each

HANDY BUTTON MACHINES

The Handy Jr. Button Machine is suitable for the small and occasional user of covered Buttons. It is easily operated and will give long satisfactory service.

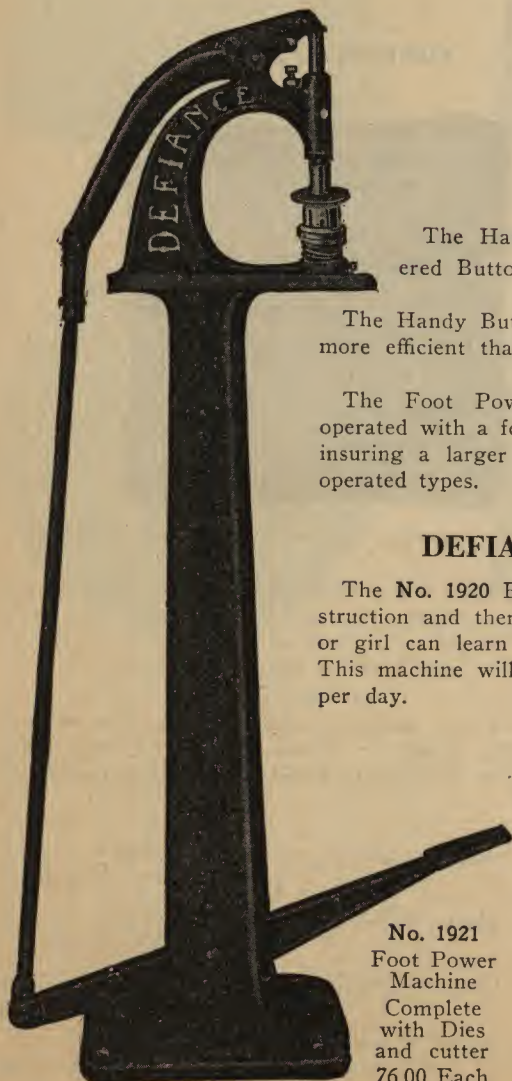

The Handy Button Machine picks up the cloth and makes the Button Automatically. It is more efficient than the Handy Jr. being adapted for production use.

The Foot Power Machines are substantially mounted and operated with a foot treadle. The Operator's hands are free thus insuring a larger output than can be produced with the hand operated types.

DEFIANCE BUTTON MACHINES

The No. 1920 Button Machine is sturdily built, simple in construction and there are no parts to get out of order. Any boy or girl can learn to operate these machines in a few minutes. This machine will produce between 15 and 25 Gross of Buttons per day.

The No. 1929 Button Machine employs Three-piece Button Covering Dies. This machine is faster in production than the Two-piece die machine.

WEIGHTED TAPE AND LEAD WEIGHTS

The use of weighted tape for holding draperies down and preventing curling and irregular sagging of the drapery produces the finished job so much desired, making it a necessity to the drapery workroom in the hanging of draperies.

The illustrations below are actual size and show the exact construction, spacing and size of lead weights used

Each weight is fastened independently to the binding, always remains in place and will not slip

MORTEMOTH

PROTECTS YOUR UPHOLSTERED
FURNITURE AGAINST MOTHS

MORTEMOTH

is a moth destroyer, and not merely a moth preventive. It kills the moth in the adult, the larval, or the egg stage. Its crystals form a poisonous gas which slowly expands killing any moths or other insects with which it comes into contact.

Mortemoth can be used effectively in many ways, but best results are obtained by tying the crystals in small, thin bags, and hanging them about the storage room or clothes closet. The crystals can, however, be sprinkled around with almost equal effectiveness. In clothing cases hang one bag every ten feet. In storage vaults, and clothes closets, hang the bags high, to permit the heavy gas to filter down through the garments to be protected. Sprinkle sparingly under carpets.

CABINET AND DRAPERY HARDWARE

**SUPPLEMENT TO
CATALOG J**

**Lussky, White & Coolidge, Inc.
CHICAGO**

ESTABLISHED 1889

SINCE the publication of Catalog J many new items have been added to our comprehensive stock of Cabinet and Drapery Hardware, Tools and Supplies. Realizing the distinct need of acquainting our customers with these new items we have published this Supplement and are sending it to you with the hope that it will contain many articles in which you are interested.

This Supplement will fit inside the cover of Catalog J and should be placed there so that both books will be together for your convenience and ready reference.

We would also like to call your attention to the items that have been discontinued since Catalog J was published. The list will be found on the inside back cover of this book.

The prices quoted are subject to change without notice, due to changing market conditions, but are on the same basis as Catalog J — being subject to a dealer's discount of 50%.
